

MOHAMED HASSAIN AKBAR A

Cybersecurity Engineering Student | VAPT | Web Application Security | SOC

Tamil Nadu, India | +91 93454 84511 | mohamedhassainakbar@gmail.com | [Linkedin](#) | [Github](#)

PROFESSIONAL SUMMARY

Final-year B.E. CSE (Cyber Security) student (CIET, 2023-2027) with hands-on VAPT, web application security, SIEM log analysis, and threat detection experience from two internships and independent CTF lab work on Hack The Box. Proficient in Burp Suite, Metasploit, Wireshark, OWASP ZAP, Splunk, and Kali Linux. Built AI-powered security tools and fraud detection systems in Python and FastAPI. Actively seeking VAPT, SOC Analyst, or Security Analyst internships and entry-level roles.

EDUCATION

B.E. CSE (Cyber Security) CGPA: 7.5 / 10

Coimbatore Institute of Engineering and Technology (CIET), Tamil Nadu 2023 - 2027

TECHNICAL SKILLS

Cybersecurity: Penetration Testing, VAPT, OWASP Top 10, Vulnerability Assessment, Threat Detection, Incident Response, IDS/IPS, SIEM, Firewall Security, API Security Testing, CTF

Security Tools: Burp Suite, Metasploit, Wireshark, Nmap, OpenVAS, Nikto, OWASP ZAP, Nuclei, Splunk, Kali Linux

Programming: Python, FastAPI, MySQL.

Networking: TCP/IP, OSI Model, DNS, DHCP, HTTP/HTTPS, Packet Analysis, Routing and Switching, Network Troubleshooting

EXPERIENCE

Ethical Hacking Intern | [Hackup Technologies](#) Jun 2025 - Jul 2025

Gained hands-on experience with Burp Suite, Nmap, Wireshark, and Kali Linux.

Performed Vulnerability Assessment & Penetration Testing (VAPT) on web applications.

Learned to identify OWASP Top 10 vulnerabilities and recommend remediation.

Monitored network traffic and analyzed HTTP/HTTPS communications using Wireshark.

Cybersecurity Intern | [Teachnook \(IIT Roorkee Certified Program\)](#) Feb 2024 - Mar 2024

Performed vulnerability assessment using Nikto, OWASP ZAP, and OpenVAS on Kali Linux.

Gained hands-on experience with Splunk for SIEM log analysis and security event monitoring.

Assisted in alert triage, IDS/IPS event analysis, and incident documentation.

Learned CVE analysis, threat intelligence, and API security testing fundamentals.

PROJECTS

UPI Shield - AI Fraud Detection App | *Python, scikit-learn, Random Forest, Gradient Boosting, MLP, Android* 2025-2026

- Built an ensemble ML model (RF 40% + GB 40% + MLP 20%) to detect UPI payment fraud on Android with 42 engineered features.
- Diagnosed and eliminated false positives through feature engineering for Q-prefix merchant IDs and expanded provider whitelists.
- Delivered production APK (UpiShield v2.1) with strong precision/recall metrics; project supervised at CIET.

SaaS Web Security Scanner | *FastAPI, Python, OWASP ZAP, Nikto, Nuclei* 2025

- Designed and built a multi-engine vulnerability scanning platform that orchestrates OWASP ZAP, Nikto, and Nuclei scans via REST API, with automated report generation for web application VAPT assessments.

TrafficShield - HTTP Anomaly Detection | *Python, Packet Analysis, IDS/IPS concepts* 2024

- Developed a Python-based real-time anomaly detection system for HTTP traffic, flagging suspicious patterns using IDS/IPS principles for proactive threat response and SIEM integration.

CYBERSECURITY LABS

- Hack The Box - Completed 15+ CTF challenges covering enumeration, privilege escalation, web application exploitation, SQL Injection, XSS, and network security in real-world-style environments.
- Active practice in offensive security methodologies: reconnaissance, exploitation, post-exploitation, and reporting using Kali Linux and Metasploit.

CERTIFICATIONS AND TRAINING

Cisco - Introduction to Cybersecurity (2026, No Expiry)

Infosys - Fundamentals of Information Security (2024, No Expiry)

Teachnook x IIT Roorkee - Cybersecurity Program (2024, No Expiry)

EC-Council CEH - Certified Ethical Hacker (Expected 2027)

ADDITIONAL INFORMATION

- Target roles: Cybersecurity Analyst, SOC Analyst (L1/L2), VAPT Intern, Security Analyst, Network Security Engineer.
- Available for internships and entry-level opportunities. Open to relocation across India.
